Mylan MS Advocate™
and Mylan’s Glatiramer Acetate Injection
40 mg/mL for 3-times-a-week injection
20 mg/mL for once-daily injection

Information about your medication
and support services.

INDICATION
GLATIRAMER ACETATE INJECTION is a prescription medicine used for
the treatment of people with relapsing forms of multiple sclerosis (MS).

IMPORTANT SAFETY INFORMATION
Do not take GLATIRAMER ACETATE INJECTION if you are allergic to
glatiramer acetate or mannitol.

Please see additional Important Safety Information throughout,
including pages 26–27. Please see full Prescribing Information,
including Patient Information Leaflet and Instructions for Use.
MYLAN’S COMMITMENT TO YOU

You can depend on the Mylan MS Advocate™ patient support program to help you access therapy as soon as possible and provide you with an array of support services to assist you in achieving your goals.

In addition, Mylan offers you our WhisperJECT™ Autoinjector® device, intended for use with FDA-approved drug products with non-viscous (aqueous) liquid formulations, which are presented in a 1.0 mL BD®, pre-filled, glass syringe with staked needle, containing a fixed needle of 27G to 29G. The WhisperJECT™ Autoinjector is a reusable injection device for the subcutaneous injection of certain FDA-approved drugs, such as Mylan’s Glatiramer Acetate Injection. WhisperJECT™ is a device with features that have been designed by patients, for patients.

We are one of the world’s leading generic and specialty pharmaceuticals companies. Our dedication to providing access to high quality medicine for the world’s 7 billion people continues to grow after more than 50 years.

*WhisperJECT™ Autoinjector is available by Rx only.

Please see additional Important Safety Information throughout, including pages 26–27. Please see full Prescribing Information, including Patient Information Leaflet and Instructions for Use.
Before You Begin

You should receive your first dose of Mylan’s Glatiramer Acetate Injection with a doctor or nurse present, whether administered with the pre-filled syringe or autoinjector. This might be at your doctor’s office or with a visiting home nurse from Mylan MS Advocate™ who will teach you how to give your glatiramer acetate injections.

Carefully read the Patient Information Leaflet and Instructions for Use sections in the full Prescribing Information for Mylan’s Glatiramer Acetate Injection, provided with this brochure.

If you use the WhisperJECT™ Autoinjector device, please read the Instructions for Use inside the carrying case.

Important Safety Information (continued)

Some patients report a short-term reaction right after injecting glatiramer acetate. This reaction can involve flushing (feeling of warmth and/or redness), chest tightness or pain with heart palpitations, anxiety, and trouble breathing. These symptoms generally appear within minutes of an injection, last about 15 minutes, and do not require specific treatment. There have been reports of patients with similar symptoms who received emergency medical care. If symptoms become severe, call the emergency phone numbers in your area.

Please see additional Important Safety Information throughout, including pages 26-27. Please see full Prescribing Information, including Patient Information Leaflet and Instructions for Use.
Helpful Resources

You may also find helpful information in the *Guide for Self-Injection With WhisperJECT™ Autoinjector (Rx Only)*, the DVD included in the Mylan MS Advocate™ Welcome Pack and the Injection Help section of the website, with more details about self-injection.

You can download a *Preparation Mat* for your injection, with designated spaces for your supplies, and a *Rotation Plan*, where you can record the area, site, day and depth setting (of the WhisperJECT™ Autoinjector device) of each injection, at [GlatiramerAcetate.com](http://GlatiramerAcetate.com).

There is also an app for smartphones called Mylan *Smart Injection Tracker™*, an interactive place to record your injections. See page 24 of this brochure for more information on Mylan *Smart Injection Tracker™*.

The information in this brochure does not take the place of talking with your healthcare provider about your medical condition or treatment.

Please see additional Important Safety Information throughout, including pages 26–27. Please see full Prescribing Information, including Patient Information Leaflet and Instructions for Use.
Mylan MS Advocate™ is your personal support team
—a program to help you get started on and stay committed to your
doctor’s treatment plan for Mylan’s Glatiramer Acetate Injection.
Whether you have questions for our MS-experienced nurses,
or need assistance from our health benefits experts with your
insurance coverage or co-pay assistance, Mylan MS Advocate™
is there for you. Our nurses are trained and knowledgeable about
your therapy. These specialists come to your home to help you
develop a plan for giving your own injections, based on your
doctor’s direction.

Your Mylan MS Advocate™ Welcome Pack
Once enrolled in the Mylan MS Advocate™ program, you will not
need to take any further steps to participate in your patient support
program. And, you will receive a Welcome Pack consisting of:

1. Neoprene Sleeve
   that showcases inspiring art created by
   Shana Stern, an artist living with MS

2. Guide for Self-Injection
   and a self-injection training DVD, with useful
   information about the WhisperJECT™
   Autoinjector device and helpful tips for
   self-injecting

3. Needle Clipper

4. Hot/Cold Gel Pack

5. Full Prescribing Information
   for Mylan’s Glatiramer Acetate Injection,
   including the Patient Information Leaflet
   and Instructions for Use

Important Safety Information (continued)
Call your doctor right away if you develop hives, skin rash with
irritation, dizziness, sweating, chest pain, trouble breathing, or
severe pain at the injection site. If any of the above occurs, do
not give yourself any more injections until your doctor tells you to
begin again.

Please see additional Important Safety Information throughout,
including pages 26–27. Please see full Prescribing Information,
including Patient Information Leaflet and Instructions for Use.
24/7 Nurse Support

In addition to the care and direction provided by your doctor, Mylan MS Advocate™ nurses are experienced in caring for people like you who have relapsing forms of multiple sclerosis. They are available to you by phone at 1.844.695.2667, 24 hours a day, 7 days a week, to answer your questions about:

• Your condition
• Mylan’s Glatiramer Acetate Injection
• Proper injection technique

Nurses provide ongoing support, education and encouragement to you, your family and your caregivers.

Experienced nurses work with you one on one to:

• Go through the injection process step by step to help you learn proper injection techniques during your in-home training or refresher training
• Help you adjust your routine based on lifestyle changes, such as changes in weight
• Provide you with tips regarding preparation, administration, storage and disposal of your medicine
• Offer you tools for tracking self-injections
• Connect you to supportive MS resources and encourage you to participate in the MS community
• Assist you in staying connected to a support network

In-Home Injection Training

You can call Mylan MS Advocate™ to schedule an in-home training session with one of our MS-experienced nurses, who can show you how to use the pre-filled glass syringe by itself or with the WhisperJECT™ Autoinjector and guide you through each step of your injection.

By staying close with Mylan MS Advocate™, you’ll find support and services that you need. On the following pages are some of the features and benefits.

Please see additional Important Safety Information throughout, including pages 26–27. Please see full Prescribing Information, including Patient Information Leaflet and Instructions for Use.
Your Benefits Advocate
Your healthcare professional is your go-to resource for your treatment plan, and your benefits advocate is your go-to resource for navigating through the requirements of your insurance plan, whether it’s private or government sponsored. Your benefits advocate can help you:

- Coordinate and optimize your insurance benefits
- Fill out and file the right forms at the right time
- Sign you up for the Mylan MS Advocate™ Co-pay Program, if you’re eligible
- Find other sources of financial assistance

MS Resources
Following enrollment, Mylan MS Advocate™ will provide you with information on topics most relevant to you, including brochures, websites and connections to MS community organizations and events. The goal of Mylan MS Advocate™ is to ensure that patients are receiving the support they need.

Get started by calling Mylan MS Advocate™ at 1.844.MylanMS or 1.844.695.2667 today.

Please see additional Important Safety Information throughout, including pages 26–27. Please see full Prescribing Information, including Patient Information Leaflet and Instructions for Use.
Mylan MS Advocate™ Co-pay Program

Your co-pay for Mylan’s Glatiramer Acetate Injection could be as low as $0 per month.*

- No financial qualifications

- If your insurance recently changed, contact Mylan MS Advocate™ to see if you are eligible for our co-pay program

*See eligibility criteria and other terms and conditions on the next page.

For the full terms and conditions, please see www.GlatiramerAcetate.com/MylanMSAdvocateCopay.

Please see additional Important Safety Information throughout, including pages 26–27. Please see full Prescribing Information, including Patient Information Leaflet and Instructions for Use.

Eligibility Criteria and Terms and Conditions:

The Mylan co-pay assistance program is open to both new and existing eligible patients who are residents of the U.S. or Puerto Rico, 18 years of age or older, and who have commercial prescription drug insurance, subject to the additional terms and conditions set forth on Mylan’s website as it may be updated from time to time—www.glatirameracetate.com.

This co-pay assistance program can be used to reduce the amount of an eligible patient’s out-of-pocket expense for Mylan’s Glatiramer Acetate Injection 20 mg/mL and/or Mylan’s Glatiramer Acetate Injection 40 mg/mL up to the maximums set forth on Mylan’s website (such aggregate amount includes dispenses of both Mylan’s Glatiramer Acetate Injection 20 mg/mL and Mylan’s Glatiramer Acetate Injection 40 mg/mL). This co-pay assistance program is not valid for uninsured patients (except for commercially insured patients without coverage for Mylan’s Glatiramer Acetate Injection 20 mg/mL and/or Mylan’s Glatiramer Acetate Injection 40 mg/mL); patients who are covered in whole or in part by any state or federally funded healthcare program, including, but not limited to, any state pharmaceutical assistance program, Medicare (Part D or otherwise), Medicaid, Medigap, VA or DOD, or TriCare (regardless of whether a specific prescription is covered by such government program); if the patient is Medicare eligible and enrolled in an employer-sponsored health plan or prescription benefit program for retirees; or if the patient’s insurance plan is paying the entire cost of this prescription. This co-pay assistance program is void outside the U.S. or Puerto Rico or where prohibited by law, taxed or restricted. This program is valid in Massachusetts through June 30, 2019, unless applicable law is amended or extended by Massachusetts; please see Mylan’s website for any updates.

Valid prescription required. Patient must be 18 years of age and older. Use of this co-pay assistance program must be consistent with the terms of any drug benefit provided by a commercial health insurer, health plan or private third-party payer. This co-pay assistance program may be changed or discontinued at any time without notice.

This co-pay assistance program is not health insurance. The co-pay assistance program is not transferable and the amount of the benefit cannot exceed the patient’s out-of-pocket expenses. Cannot be combined with any other rebate/coupon, free trial, or similar offer for the specified prescription. The co-pay assistance is not redeemable for cash. No additional purchase is required.

Data related to your redemption with this co-pay assistance program may be collected, analyzed and shared with Mylan for market research and other purposes related to assessing co-pay assistance programs. Data shared with Mylan will be aggregated and de-identified, meaning it will be combined with data related to other co-pay assistance program redemptions and will not identify you.
When you receive your supply of Mylan’s Glatiramer Acetate Injection pre-filled syringes, you should mark the date you receive them on the carton and then refrigerate them at 36°–46° F. Ensure they are kept out of the reach of children.

Mylan’s Glatiramer Acetate Injection should never be frozen or exposed to intense light. If a glatiramer acetate injection syringe freezes, it should be discarded in a sharps disposal container.

While refrigeration is preferred, you may keep Mylan’s Glatiramer Acetate Injection at room temperature (59°–86° F) for up to 1 month when you do not have access to refrigeration.

Chest pain may occur either as part of the immediate post-injection reaction or on its own. This pain should only last a few minutes. You may experience more than one such episode, usually beginning at least one month after starting treatment. Tell your doctor if you experience chest pain that lasts for a long time or feels very intense.

Please see additional Important Safety Information throughout, including pages 26–27. Please see full Prescribing Information, including Patient Information Leaflet and Instructions for Use.
Features of the WhisperJECT™

Mylan has developed the WhisperJECT™ Autoinjector,* which is intended for use with FDA-approved drug products with non-viscous (aqueous) liquid formulations, which are presented in a 1.0 mL BD®, pre-filled glass syringe with staked needle, containing a fixed needle of 27G to 29G. The WhisperJECT™ Autoinjector is a reusable injection device for the subcutaneous injection of certain FDA-approved drugs, such as Mylan’s Glatiramer Acetate Injection.

The WhisperJECT™ Autoinjector device has features that have been designed by patients, for patients:

- **Textured handle** designed for a good grip and steady injection
- **Needle shield** that hides the needle during injection
- **Large viewing windows** on front and back to give you a visual confirmation when your injection is complete

If you use the WhisperJECT™ Autoinjector device, please read the Instructions for Use inside the carrying case.

*Caring for Your WhisperJECT™ Autoinjector

Cleaning your WhisperJECT™ Autoinjector device is easy. Wipe the accessible areas with a clean, damp cloth after each use. Do not immerse in water and do not clean with solvents, detergent or alcohol.

Your device needs to be replaced after 2 years. Contact Mylan MS Advocate™ at 1.844.695.2667 for replacement.

Please see additional Important Safety Information throughout, including pages 26–27. Please see full Prescribing Information, including Patient Information Leaflet and Instructions for Use.

*WhisperJECT™ Autoinjector is available by Rx only.
Traveling with Mylan’s Glatiramer Acetate Injection and the WhisperJECT™ Autoinjector

You can travel with Mylan’s Glatiramer Acetate Injection. Pre-filled syringes may be kept at room temperature (59°–86° F) for up to 1 month during travel or special circumstances when refrigeration may not be available.

- Make sure to bring enough supplies with you. In case of emergencies or a change in plans, pack more syringes than you need. Be sure to pack enough cotton balls and alcohol wipes for the number of days you’ll be away.
- You might also want to use a tight-locking plastic storage bag for all of your supplies.
- If you’re traveling by plane, keep Mylan’s Glatiramer Acetate Injection pre-filled syringes and the WhisperJECT™ Autoinjector device in its travel case in your carry-on luggage, so they’re easily accessible.
- To avoid unnecessary delays, bring your current prescription label with you; your name on the prescription label should match your name as it appears on your ID.

Important Safety Information (continued)

A permanent indentation under the skin (lipoatrophy and, rarely, death of your skin tissue also referred to as necrosis) at the injection site may occur due to local destruction of fat tissue. Be sure to follow proper injection technique and inform your doctor of any skin changes.

Please see additional Important Safety Information throughout, including pages 26–27. Please see full Prescribing Information, including Patient Information Leaflet and Instructions for Use.
Injection Tips

For detailed instructions on how to use Mylan’s Glatiramer Acetate Injection, please see the Instructions for Use in the full Prescribing Information, the Guide for Self-Injection and the DVD included in the Mylan MS Advocate™ Welcome Pack, as well as the Injection Help section of GlatiramerAcetate.com.

Here are some helpful tips to remember each time you self-inject:

• You should remove your pre-filled glass syringe from the refrigerator about 20 minutes before you self-inject

• You can lay out your supplies for injection on the Preparation Mat, which you can download from GlatiramerAcetate.com

• Choose an area of your home to inject that is well lighted and has a clean, flat surface

• Always wash your hands thoroughly with soap and water before injecting. Be careful not to touch your face or hair after washing your hands

• Mylan’s Glatiramer Acetate Injection is given by injection under your skin (subcutaneously). Do not inject Mylan’s Glatiramer Acetate Injection in your veins (intravenously)

Important Safety Information (continued)

The most common side effects in studies of GLATIRAMER ACETATE INJECTION are redness, pain, swelling, itching, or a lump at the site of injection, flushing, rash, shortness of breath, and chest pain. These are not all of the possible side effects of GLATIRAMER ACETATE INJECTION. For a complete list, ask your doctor or pharmacist. Tell your doctor about any side effects that you have while taking GLATIRAMER ACETATE INJECTION.

Please see additional Important Safety Information throughout, including pages 26–27. Please see full Prescribing Information, including Patient Information Leaflet and Instructions for Use.
Rotation Plan and Mylan Smart Injection Tracker™

It’s important to keep up with your injections of Mylan’s Glatiramer Acetate Injection, whether you’re at home or on the go.

Mylan has tools to help you, including an injection Rotation Plan you can download from our website, GlatiramerAcetate.com.

If prescribed the WhisperJECT™ Autoinjector device, you can manually record the area, day, site and depth setting for each injection. Or you can use Mylan Smart Injection Tracker™, which tracks your injections quickly and reliably.

Features of the app include:

- Injection reminders
- Easy injection area and site rotation tracking to help you avoid injecting in the same site more than once a week
- Note-taking feature that lets you record questions and concerns so you can discuss them with your doctor or a Mylan MS Advocate™ nurse

You can download your free Mylan Smart Injection Tracker™ for your smartphone from app stores.

Please see additional Important Safety Information throughout, including pages 26–27. Please see full Prescribing Information, including Patient Information Leaflet and Instructions for Use.
Important Safety Information

Do not take GLATIRAMER ACETATE INJECTION if you are allergic to glatiramer acetate or mannitol.

Some patients report a short-term reaction right after injecting glatiramer acetate. This reaction can involve flushing (feeling of warmth and/or redness), chest tightness or pain with heart palpitations, anxiety, and trouble breathing. These symptoms generally appear within minutes of an injection, last about 15 minutes, and do not require specific treatment. There have been reports of patients with similar symptoms who received emergency medical care. If symptoms become severe, call the emergency phone numbers in your area.

Call your doctor right away if you develop hives, skin rash with irritation, dizziness, sweating, chest pain, trouble breathing, or severe pain at the injection site. If any of the above occurs, do not give yourself any more injections until your doctor tells you to begin again.

Chest pain may occur either as part of the immediate post-injection reaction or on its own. This pain should only last a few minutes. You may experience more than one such episode, usually beginning at least one month after starting treatment. Tell your doctor if you experience chest pain that lasts for a long time or feels very intense.

A permanent indentation under the skin (lipoatrophy and, rarely, death of your skin tissue also referred to as necrosis) at the injection site may occur due to local destruction of fat tissue. Be sure to follow proper injection technique and inform your doctor of any skin changes.

Important Safety Information (continued)

The most common side effects in studies of GLATIRAMER ACETATE INJECTION are redness, pain, swelling, itching, or a lump at the site of injection, flushing, rash, shortness of breath, and chest pain. These are not all of the possible side effects of GLATIRAMER ACETATE INJECTION. For a complete list, ask your doctor or pharmacist. Tell your doctor about any side effects that you have while taking GLATIRAMER ACETATE INJECTION.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.

Please see full Prescribing Information, including Patient Information Leaflet and Instructions for Use for GLATIRAMER ACETATE INJECTION 20 mg/mL or GLATIRAMER ACETATE INJECTION 40 mg/mL.
